Possible Class (Objects) Structure

- Course Objects (one for each course the prof teaches) which contain a list of
    - Assignment Objects (one for each assignment) which contain
        - Info Object - Stores information regarding the assignment itself.
        - Submission Objects - One for each student's submission; contains submitted file(s), comments, and grades.
- Class(es) for GUI

See diagram below. This may or may not work, depending on how much data is stored locally and how the Canvas API works.
